DETAILED ACTION

It should be noted that claim 65 was repeated twice. However, since the subject matter in both claims was substantially similar, the claims were kept in the same group, and the claims have not been renumbered.

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a method of forming a patterned polymeric film, classified in class 156, subclass 380.8.
 - II. Claims 20-48, drawn to a method of forming an assembly of particles embedded in a polymeric film, classified in class 424, subclass 474.
1. The inventions are distinct, each from the other because of the following reasons:
2. Inventions I and II, are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects. The invention of group I is directed toward forming a patterned polymeric film in which formation of patterned films occur in designated areas of a second electrode, whereas the invention of group II is directed toward forming an assembly of particles embedded in a polymeric film in which an assembly of particles form in designated areas of a second electrode instead.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for others, restriction for examination purposes as indicated is proper.

Art Unit: 1641

4. A telephone call was made to Julie Bowker on September 30, 2004 to request an oral election to the above restriction requirement, but could not be reached and therefore did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nelson Yang whose telephone number is (571) 272-0826. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long V Le can be reached on (571)272-0823. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
